DETAILED ACTION

Allowable Subject Matter

Claims 1-2, 4-16 and 18 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for establishing VPN tunnels in a wireless network. Independent claim 1 identifies the uniquely distinct features of "passing identifying information associated with a wireless user to a VPN host network the identifying information comprising a conceptual ID, user ID, and password; evaluating the identifying information by the VPN host network to obtain a VPN host network access result; and granting wireless access to the wireless user on the wireless network based on the VPN host network access result, to thereby enable both wireless network access and VPN host network access to be obtained without requiring evaluation of the identifying information by the wireless network". Independent claim 12 identifies the uniquely distinct features of "a processor containing control logic configured to: establish an encrypted session with a wireless user; and establish a VPN tunnel to a VPN host network on behalf of the wireless user; wherein the control logic is configured to rely on the VPN host network for authentication and authorization services with respect to the wireless user". The closest prior arts, Higgins (US 6,831,921) and Gilman (US 20030079121), each disclose conventional systems for establishing secure communications. Both fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
